〈HOW TO USE THIS CATALOGUE〉

1. INTRODUCTION

Before placing a purchase order for spare parts, please read following instructions to avoid any misunderstandings.

2. DEFINITION

In this catalogue, a "part" means each component of a fax machine. Every part has its own name and own number in order to distinguish each other.

3. HOW TO SEE THIS CATALOGUE

Example: D61182 ··· ① PARTS LIST
D61－001··· ② COVER··· ③

	NO··· ④	PART NO··· ⑤	PART NAME··· ⑥	QTY··· ⑦	UNIT PRICE··· ⑧
⑨ ＊	001－001	D61-0323A-5X	TOP COVER	1	
＊	002	D61-03040-5XJ	LCD WINDOW	1	
	003	D61-03050-5XA	TEN KEY	1	2,310
	004	# ··· ⑩	#	#	#
	101	D61-0323A-4X	TOP COVER ASSY	1	1,200

(1) Explanation :

① Product Code	:Code number of the machine you use. Every model has its unique code number representing the country and its specification.
②Page Index	:Used to refer the page number of illustration.
③Cover	:The word that indicates the section of the facsimile the whole illustration on the left page shows.
④Index No	:Represents reference number of each part in the illustration.
⑤Part No	:Part number.
⑥Part Name	:Name of the part.
⑦Q'ty	:The quantity of the part which this "Index No" indicates.
⑧Unit Price	:Price of the part.
⑨Asterisk （＊）	:Parts marked with an asterisk are not available as stand - alone parts. So, prices for those parts are not shown .They must be ordered as an assembly which is surrounded by a black-edged block in the illustration.
⑩Sharp （#）	:Parts marked with a sharp are not used for your machine.

(1) HOW TO USE THIS CATALOGUE

The catalogue consists of an illustration and Parts List . Please identify your requested part in the illustration on the left page, find the index number and look through the right page to find the part number of the required component.

4. PART NUMBER

The most important information is the part number.

(3 digits)	+	(5 digits)	+	(2 or 3 digits)	= 10 or 11 digits
D61	—	08120	—	5 X X	
①		②		③④⑤	

①Model code :Specifies the model. Since some parts are common to several models, there are some parts whose "Model Code" differs from the other parts, though they are all a part of a machine of one product code.

②Part code :Identifies the part in a model.

③Level code :Represents the level of parts assembly.
- 6: Not assembled
- 5: Several parts are assembled.
- 4: Several "level 6" and/or "level 5" parts are assembled
- 3: "Level 6", "level 5", and/or "level 4" parts are assembled.

④Sub Number :Represents how many times the part was upgraded. Initially, the part starts with "0" and then becomes "1" with one upgrading, and so on. When you order a part, please write an "X" for the sub number as shown in the list, and we will supply the part with the latest version number. The parts are interchangeable regardless of their sub numbers.

⑤Supplementary code :Used for our convenience. Please just put "X" when ordering.

EXCEPTION; the above rule is not applied to the parts with numbers which start with "Z" (Ex,:Z06-34231-A0), since they are purchased from other vendors. So please write the number exactly the same as shown on the list. Please do NOT write "X" unless the part number actually ends with "X".

* As for the parts to maintain the basic functions of the machine, we will generally supply them for five years after the machine production is discontinued.
* The parts price on this catalogue are subject to change without notice. If the price of a part has been changed, the new price will be informed when we answer shipping dates for purchase orders.
* Please let us know the "Product Code" every time you place an order for a **Main Control PCB.**
  The rom for each Main Control PCB differs by product code even if they have the same Part Number.

D88 CONTENTS
